

I understand that the National Association of Broadcasters is trying to stifle satellite radio by getting the FCC to limit satellite radio from broadcasting local information to certain cities. Please don't let the NAB bully you into giving in to their demands. If one wants to listen to local radio, all they have to do is turn the dial.

If one wants to listen to satellite, the same dial will let them do that. It isn't broken, and doesn't need to be fixed.

Thank you.
